Search Engine Optimization Proposal

Executive Summary

Sycosure’s technique involves a mix of the most powerful SEO strategies employed by any firm in the country. Since search engines rarely disclose detailed information regarding their algorithms, so using any one method will likely fail to produce the desired results. Because of this, we tirelessly test every known method of visibility improvement, but we also realize that major search engines update their algorithms frequently, and as such, methods that are successful today may be weakened tomorrow. For this reason, Sycosure’s approach is to employ multiple methods of search engine optimization to ensure that desired results are achieved.

Our methodological approach to web marketing assumes that every website possess unique challenges and therefore requires a customized strategy to achieve optimal results. The varying dynamics of your industry segment, competition, business focus, brand, target audience, geographical location, and promotional budget proves difficult to devise a ‘one size fits all solution. It is with this view that we have devised a flexible cost effective web-marketing program that can be tailored to your industry requirements.

First Month Strategy

- **Website Optimization**
  
  **Duration: (14 Days)**

  During the Website Optimization phase, we will work together to develop a strategy and implement key changes that will deliver immediate results. The effort quickly addresses critical search engine optimization enhancements to your web site, quickly increases ranking, traffic and Google AdWords conversion efficiency. The Website Optimization covers optimization of up to 10 page’s (static or dynamic) in a website, on-page optimization and strategic selection of key phrases that will drive targeted traffic to your site.

  **Recommendations for Website Optimization include:**

  1. **SEO Planning, and Strategy (2 Weeks)** - To really make your web marketing campaign a huge success, we would develop a deep understanding of your business; what you are trying to accomplish and what your goals are. This discovery interview provides critical business intelligence aimed around what's happening in your industry. During the interview process an intelligence gathering survey form will guide us through an inquiry into the nature of your business needs, competition, and desired outcome. In addition you can ask any questions that may be concerning you in regards to the types of changes that will be made to your web site, when to expect results, and lays the strategic foundation for your ongoing web marketing campaign.

     1. **Goal Setting**
     2. **Competitor Benchmarking**
     3. **Keyphrase Research (2 days)**
        - Discover keywords which will produce the highest volume of traffic
        - Keywords that the competition are using to find success
        - Keywords that have the highest AdWord values
        - Significant high traffic keywords your rivals do not know about
        - Newly rising keywords primarily based on new trends & services and products related to your industry
        - Keywords with high conversion rates to raise your ROI
        - Gap Analysis
        - Keyphrase Selection
        - Tracking and improvement process

  2. **Index inclusion and coverage (1 Week)** – We tell the search engines which pages are most vital to your search engine marketing campaign by using Google & Yahoo! XML Sitemaps. We will create and adjust the required areas inside the sitemaps to make sure that your most important pages are given the correct prominence. In addition, we will take active steps in troubleshooting and monitoring your website with Google Webmaster Tools Console. This permits us to accurately identify and track your back-links, link recognition, damaged links and indexing speeds; as reported by Google.
Site submission – including search engines and directory inclusion
Google Webmaster Tools creation
Google Analytics creation
Dynamic XML Site Map Generation and Submission
Evaluating robot indexing activity - use of Robots.txt
Domain strategy – approaches to distribute content including domain variants, sub-domains, geo-location, and canonicalization
Google sandbox effect, content freshness, content duplication and link velocity
Indexing of dynamic content including problems with URL rewriting and Session ids

3. **On-page optimization (1 Week+)** – We will make your site search engine friendly by incorporating your selected keywords into existing internet pages, or new pages and changing the keyword saturation and density (2-3%) needed to achieve top 10 rankings, modifying and optimizing the most vital areas in your site’s source code, making and implementing several level adjustments to guarantee your site is search engine friendly.

- Keyphrase factors include keyword density, relevancy, synonyms and position
- Page markup keyphrase factors including syntactical accuracy, page code structure, <title> tags, <meta> tags, <a href=> hyperlink tags and <img> alt tags
- H1/H2/H3 HTML Tags
- Canonical home page issues
- Meta Tags.
- URLs.
- Internal links.
- Mobile-friendliness.
- Outbound links.
- Preventing keyword cannibalization.
- Site speed.
- Image tags

**All Inclusive SEO and Publicity Campaign**

**Approach** – All monthly plans include an in-depth Website Optimization analysis. The results from your Website Optimization, will reveal how your target audience and competitors interacts online, who the key influences are, and ways to connect with your audience in a transparent non-obtrusive fashion.

4. **Citation Building (for local businesses)** - One of the hardest parts of web marketing for local businesses is building citations. Obtaining massive numbers of relevant "citations" has become one of the central focuses of today's local web marketing strategy.

**Benchmarking and Reporting Key Performance Indicators (KPI)**

- **Monthly Benchmarking Reports**: We will run a benchmark ranking report showing all your existing listings, in the major search engines before we start. This concise report will be sent monthly to help document our progress.

- **Monthly Website Position Report**: Every month, we will run a ranking report to document the progress and send it to you via email. The rank reports include rank reporting on Yahoo, Google, and Bing, and indicates which keyword your web site currently ranks for on the search engines.

- **Monthly Website Analytic Report**: Every month, we will provide an analytic report detailing visitor behavior. The report will include the source of the visitor, bounce rate, pages visited, time on page, as well as other key data to help optimize the website.

**When can you see results?**
Since search engines index/re-index the optimized site in 4-12 weeks. Some search engines like Google crawl your site more frequently if your site is updated more frequently. Realistically, you can expect to see results starting 4-6 weeks after submission. Indexing, re-indexing shuffle also takes some time to settle down. Rankings usually stabilize after about two months. However, your traffic rises continuously since more and more search engines index more and more optimized pages of your website.

**Pricing:**
Your proposed service fees will include:

- Initial Setup Fee, Keyword Research, Web-site Optimization: $750
- Monthly SEO Campaign Cost: $500
- Contract Duration: 12 Months
